**1. Significant accounting policies:**

These financial statements are prepared in accordance with Canadian accounting standards for not-for-profit organizations. The significant accounting policies are detailed as follows:

**(a) Measurement uncertainty -**

The preparation of financial statements in accordance with Canadian accounting standards for not-for-profit organizations requires management to make estimates and assumptions that affect the reported amount of assets and liabilities, and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amount of revenues and expenses during the reporting period. These estimates are reviewed periodically, and as adjustments become necessary they are reported in income in the period in which they become known.

**1. Significant accounting policies (cont'd)**

(e) **Financial instruments -**

(i) **Measurement of financial instruments**

The organization initially measures its financial assets and liabilities at fair value, except for certain related party transactions that are measured at the carrying amount or exchange amount, as appropriate.

The organization subsequently measures all its financial assets and financial liabilities at cost or amortized cost, except for investments in equity instruments that are quoted in an active market, which are measured at fair value. Changes in fair value are recognized in excess (deficiency) of revenues over expenditures in the period incurred.

Financial assets measured at amortized cost include cash.

Financial liabilities measured at amortized cost include accounts payable and accrued liabilities.

Financial assets measured at fair value include portfolio investments.

(ii) **Financial instrument risks**

Unless otherwise noted it is management's opinion that the organization is not exposed to significant interest, currency, market, liquidity or credit risks arising from these financial instruments.

**2. Financial instruments:**

Transactions in financial instruments may result in an entity assuming or transferring to another party one or more of the financial risks described below. The required disclosures provide information that assists users of financial statements in assessing the extent of risk related to financial instruments.

(a) **Other price risk**

Other price risk is the uncertainty associated with the valuation of assets arising from changes in equity markets. The company is exposed to other price risk through its equity holdings within its investment portfolio. The company reduces its exposure to other price risk by actively monitoring its investment portfolio to determine if there are any significant changes in the market that could adversely affect the investments. In management's opinion equity risk exposure to the company is low and has not changed significantly from the previous fiscal year.
